DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims 39-56 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 5/19/04.

This application is in condition for allowance except for the presence of claims 39-56 directed to a species non-elected without traverse. Accordingly, claims 39-56 have been cancelled.

Allowable Subject Matter

Claims 1-38 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record showed a rotary actuator coupled to a base and a pivot actuator and also a bearing member including a fixed portion that is coupled to a base and a moving portion that is coupled to a support shaft. However, the prior art of record failed to show either alone and/or in combination a rotary actuator controlling the angular position of the pivot actuator; a displacement member coupled to an output shaft of the pivot actuator, the pivot actuator controlling the linear position of the displacement member; a support shaft pivotably coupled to the displacement member and a bearing including a fixed position that is coupled to the base and a moving portion that is coupled to the support shaft, such that the angular position and linear position of the displacement member is translated to a corresponding angle and inclination angle in the support shaft.
